# NETWORK EVALUATION

## DEEPER INSIGHTS & KNOWLEDGE TO PLAN

The first step in any valuable relationship is understanding. A network evaluation by JMARK opens up the door for you to gain clear insight into three things:

- *Your network and the technology you use every day to run your business.* Find out if there are hidden vulnerabilities creating risk or inefficiencies costing you money and holding you back.

- *The future of your IT.* Learn what is working well and what could use improvement. See how you can invest your IT budget for a stronger network and technology that creates long-term value.

- *The level of outcomes that JMARK delivers.* Think of this as a test drive of our partnership. Get vision into how we do our work, and how our teams will work together for the good of your business.

**1** **REDUCE RISK**
Know your vulnerabilities.

**2** **INCREASE EFFICIENCY**
Get more from what you've got.

**3** **INCREASE PROFITS**
More bang for your IT buck.

**4** **SIMPLIFY**
Streamline and save money.

# A "PEEK UNDER THE HOOD"

Modern IT is complex, and the design of your network can grow complicated as time goes by and your business grows. Some parts can become outdated, while others become unwieldy as solutions are added. A **Network Evaluation** from JMARK gives you a look into your entire IT environment so that you have a complete picture of how things are working and where improvements can be made. It's a proactive checkup for the technology that runs your business.

With a **Network Evaluation** by JMARK, you get:

- A deep internal network scan to look for vulnerabilities, missing patches, and other issues that create risk.
- A review of your patch and anti-virus management against recommended best practices.
- A review of spam filtering and email security.
- Active Directory (AD) scan to ensure best-practice configurations for all accounts and users.
- Line-of-business application inventory to look for overlaps and underused resources.
- Backup solution review to check your configuration & coverage.
- Domain name service (DNS) and dynamic host configuration protocol (DHCP) checks.
- A thorough review of network time protocol and time synchronization (NTP) design.
- A group policy object (GPO & GPP) configurations report to summarize the outcomes of your current policies.
- An in-depth report and executive summary of our findings compiled by a senior engineer so you can take action to strengthen your IT.

## The ⟨⟩ JMARK Difference

JMARK combines IT security and strategy with a people-first approach to help your business thrive. With teams dedicated to product development, testing, research, automation, business intelligence, and proactive solutions, we create unrivaled technology outcomes that reduce risk, increase business velocity, and let you focus on what matters. In fact, a third-party research study showed that JMARK clients enjoy thirty more hours of discretionary time each week! As a JMARK client, what will you do with the extra time?
